Defense on a String

A basketball practice tool designed to teach defensive principles. It has 5 belts that are connected by bungee cords to simulate the concept of a team playing on a string defensively. The adjustable belts wrap comfortably around the waist and as one player rotates to close out on the ball, every other player will feel a tug as a reminder to get in a help position or a passing lane. This revolutionary product can be used to teach players both man-to-man or zone defense. It fosters the muscle memory needed for good defensive execution by reinforcing the need for every player to move when the ball is in flight.
