

COLISEUM HAMMER CAGE DRILL SPECIFICATION FOR WINCH OPERATION

A drill with a 1" socket attached is needed to operate the winch of the Coliseum Hammer Cage in order to raise and lower the cage net; this drill **IS NOT** provided by Gill Athletics.

The drill needs to be equipped with a 1/2" chuck and is made for heavy duty applications.

Below are examples of drills on the market.
recommended by Gill Athletics.

Corded drill examples (or similar):

- Milwaukee 3102-6
- Dewalt DW120K

NOTE:

Gill Athletics is not responsible for providing a drill, selecting a drill, providing an extension cord, or repairing/replacing a damaged drill.

For corded drills, consider electrical outlet and extension cord needs to reach the winch of your Coliseum Hammer Cage.
